

Course Title: Electrofusion (7201)	
Duration: 3 Days	Certification: Blueflame Certification
Expiry Period: 3 Years	Award: Attendance Certificate

Introduction:

LASNTG has developed this three-day course for those who work in Electrofusion.

Aim of Programme:

To provide learners with relevant knowledge and technical competence to join polyethylene pipe safely using Electrofusion Techniques.

Target Learner:

Learners can be Plant Operative, General Operative, Technician, Engineer and Supervisor.

Learning Outcomes:

On completion of this programme, the learner will be able to:

- Demonstrate an understanding of the theory and background to Electrofusion techniques.
- Describe pipe work installation procedures and the elements required to make successful joints using Electrofusion methods.
- Correctly set up the necessary equipment and demonstrate the ability to join PE pipes together.
- Effectively deal with joint faults and assure joints are of a suitable standard in accordance with industry best practice.

Assessment:

As required for Blueflame Certificate.

Entry requirements:

- Applicants must be able to demonstrate a level of knowledge, skill and competence associated with Level 4 of the NFQ.
