

Course Title: Quality Assurance Wastewater Treatment Plants (2111)	
Duration: 2 Days -with interval of some weeks in between	Certification: LASNTG Certification
Expiry Period: 3 Years	Award: Attendance Certificate

Aim of Programme:

The aim of this programme is to provide basic skills and knowledge for Local Authority personnel and others an overview of the process of implementing a quality assurance system at a wastewater treatment plant.

Target Learner:

This training programme is for learners who will have worked with or have experience in the process of implementing a quality assurance system at a wastewater treatment plant. Learners can be a Plant Operative, Engineer or Supervisor.

Learning Outcomes:

On completion of this programme, the learner will be able to:

- Demonstrate an understanding of quality requirements for wastewater treatment plant effluent and quality assurance systems.
- Accurately describe the necessary requirements for quality assurance systems.
- Demonstrate a practical knowledge of relevant case studies.
- Correctly and efficiently prepare the relevant trend graphs, action reports and maintenance schedules.

Assessment:

There are currently no assessments required to complete this course.

Entry requirements:

- Applicants must be able to demonstrate a level of knowledge, skill and competence associated with Level 4 of the NFQ.
- It is desirable if they have worked in or are familiar with the operations of a wastewater treatment plant.

Equipment the learner must bring to the course:

- Personal Protective Equipment (Safety Boots / High Vis)
